

ABSTRACT

A method for the production of a fluorinated phenylenediamine is provided which comprises steps of
5 reacting a diamide represented by the following formula with NaOCl at a molar ratio of the NaOCl to the diamide in the range of 2.0 - 6.0 and NaOH at a molar ratio of the NaOH to the diamide in the range of 1.8 - 6.0 is provided. According to this invention, the fluorinated phenylenediamine can be
10 produced conveniently in a high yield.
